## Issue/Results Sought

Issue

I strongly disagree with a water company raising rates to

our community/younty 80%. I think this is outrageous to the consumers who have no choice but rely on this service. I also think is is ironic that we sell the water from our lake that they sell back to us. There has to be some guidlines for such extreme rate increases. It was even offered by our county to take on the local systems and maintain the system and all liabilities. I will be very disappointed in our state if such a request to a utility company is approved that affects our citizens.

**Results Sought**

That Carolina Water Service not be allowed to increase rates.
